Elizeu Carlos

SOFTWARE DEVELOPER

elizeucarlosc@gmail.com | Seixal, 2855-028, Portugal | 961821408

Profile

I'm looking for a challenging career opportunity in the field of web / app development, and besides that i want to improve my skills and utilize my previous work experience, academic background and social skills in order to be efficient in the company.

My areas of expertise are React JS , Node , CSS , JavaScript , PHP.

I've worked also with React JS and React Native in some projects, but i'm not limited to these ones because i'm a fast learner and i can adapt myself easily.

Employment History

WEB DEVELOPER, Megasites, Almada

February 2008 — June 2008

- Database and server maintenance

- Performing security tests for their existing websites

- Developed several websites for tourism agencies in asp and PHP

- Implemented a full file management system in PHP

Full Strack Web Developer, Omex Technology Services Ltd, Oeiras

January 2014 — July 2020

- Developed telecom web tools for omex and their partners.

- Developed full stack projects most of the time using Node JS and php in the backend.

- Unit and End-to-End tests for the existing projects

- Responsible to transform wireframes into a fully responsive frontend.

Wordpress Plugin and Theme Developer, Jazzy Dance Studios, Lisbon

July 2020 — September 2020

Jazzy Dance Studios gave me the responsibility to develop their new online classes system called "Jazzy Play".

In order to do that, i developed a plugin and a theme from scratch and did some code modifications related with the woocommerce plugin so that they could have something unique.

The project can be seen here.

https://play.jazzy.pt

Web Developer, Jazzy Dance Studios

January 2021 — June 2021

- Responsible for the development of a platform for online classes

- The classes are video based and only the members with memberships have access to it.

- The platform has a back office where the admin / editor can add classes, creating / editing memberships , add /edit / remove users , set payment methods , upload files and much more.

Technologies used

[MongoDB , React JS , Node JS]

Freelancing Projects

Web Developer, Sevilla Language Planet

- Developed an informative webpage of an english school based in sevilla , spain.

- Currently i'm the responsible of the web page maintenance.

Technologies used

[php , javascript , wordpress]

Rect Native Developer, Drive Limousine

- Company hired me to develop an Android / Ios app similar to uber.

- The App had 2 versions, the driver and client version.

- Clients could rent a van, SUV or an executive car for a special event.

- After a driver was assigned to a client, the driver could interact with the client till the end of the service.

- Developed a back office so the company could manage everything related to reservations, invoices, drivers and clients

Technologies used

[React Native , Php , React JS]

React Developer, Lostroom

- Ticket System to help control the number of people of people at an event.

- There was the one app for the event management and another one for the clients.

- The clients could pick an event and request a QR CODE in order to get to the event

- The moderators of the event could read the qr code using the event management app

- The event management app had some interesting features like: limit the number inside of an event, notifications to the clients to let them know if the event allow the entrance of more people or not, a queuing system.

Technologies used

[Php , React JS , React Native, Node JS]
